Subject Index

A

Acetaldehyde, assimilation of, 133
Acetic acid, assimilation of, 133
Acetone-butanol fermentation, by *Clostridium acetobutylicum*, 295
β-*N*-Acetylglucosaminidase, from *Streptomyces* sp., properties of, 593
Acinetobacter calcoaceticus, continuous culture of, 229
Actaplatin, production by *Actinoplanes missouriensis*, 85
Actinomycetes, from soil, 501, 609
Actinoplanes missouriensis, production of actaplatin by, 85
Activated sludge, control of, 333
Adenosine, ATP production from, 255
Adenosine, production by xanthine-requiring mutants, 145
Adsorption, of bacteria, 449
Adsorption isotherms, of glutathione and glutamic acid, 61
β-Alanine, effect on amylase production, 707
Alcohol concentration enzyme activity influenced by, 537
Aldose reductase, from *Pachysolen tannophilus*, 17
Alfalfa, *in vitro* production of its somatic embryos, 353
Alkaline protease, from *Bacillus* sp., 345
Alkalophilic *Bacillus*, amylase production by, 707
Amino acid, enzymatic reaction for, 395
α-Amino-β-(1-indoline) propionic acid, production by *Escherichia coli* from indoline and L-serine, 395
5-Aminolevulinic acid production, by photosynthetic bacteria, 511
Ammonia, inhibition of human cell culture by, 425
Ammonium, growth inhibition to human cells by, 341
α-Amylase, in *mirin* mash, 537
Amyloglucosidase, immobilization of, 531
Amylase, production by alkalophilic *Bacillus*, 707
α-Amylase, production by *Saccharomycopsis fibuligera*, 387
Anaerobic degradation, of dehydrodiisoeugenol, 221
Anaerobic digestion, of glucose, 159
Animal cells, continuous culture of, 425
Artificial humic acid, as selective nutrient for actinomycetes, 609
Aspergillus nidulans, cellulase production by, 635
Aspergillus niger, intraspecific fusant of, 557
Aspergillus niger, production of citric acid by, 557
Aspergillus wentii, the production of β-glucosidase by, 95
ATP, production by methanol yeast, 255
Attached growth, of bacteria, 449
Autotrophic denitrification, with *Thiobacillus denitrificans*, 683
Autotrophic denitrification, using elemental sulfur, 683

B

Bacillus circulans, production of cyclomaltodextrin glucanotransferase by, 463
Bacillus sp., alkalophilic and producing alkaline protease, 345
Bacillus sp., pretreatment of rectic waste, 243
Bacillus sp., production of adenosine by, 145
Backwashing, of filter membrane, 77
Batch culture, of *Spirulina* sp., 267
Beef tallow, hydrolysis of, by lipase, 23
Bifidobacteria, mortality in yogurt, 215
Bifidobacterium breve, in yogurt, 215
Bifidobacterium longum, in yogurt, 215
Bikaverin, production by *Gibberella fujikuroi*, 717
Biomass yield, of *Acinetobacter calcoaceticus* from palm oil, 229
Biofactor, in sludge bulking, 731
Biotreatment, of petrochemical efluent, 731
Blue pigment, formation from gardenia fruits, 419
Blue pigment, formation of, 711

Blue pigment, purification of, 419
Bonito extract, as nitrogen source for alkaline protease production, 345
Bulking sludge, restration to the settling ability, 333

C

Calcium alginate gel, stabilization with polyelectrolyte complex, 659
Candida boidinii, formaldehyde production by, 489
Candida boidinii, sorbitol production by, 405
Candida boidinii no. 2201, ATP production by, 255
Candida guilliermondii, pyruvate kinase from, 517
Candida sp., ethanol-utilizing yeasts belong to, 133
Candida sp., in methane fermentation, 49
Carbon balances, in the anaerobic chemostat culture, 159
Carbon source, effect on ice-nucleating activity, 693
Cassava starch waste, for SCP production, 11
Cationic surfactants, as sludge conditioners, 583
Cell-bound enzyme, to *Streptomyces* mycelia, 593
Cellulase, exo-β-1,4-glucanase endo-β-1,4-glucanase, β-1,4-glucosidase, 635
Cellulase formation, by *Aspergillus nidulans*, 635
Cellulase production, by *Trichoderma* reesei, 703
Cellulosic material, decomposition of, 675
Cheese whey, ethanol production from, 249
Chemostat culture, of a methanogenic, 159
Chemostat culture, of *Acinetobacter calcoaceticus*, 229
Chitosan, immobilization on, 493
Chromatography, design of large-scale column, 111
Cibacron Blue, inhibition of pyruvate kinase by, 517
Citric acid, production of, 557
Clostridium acetobutylicum, for aceton-butanol fermentation, 295
Co^{2+}, blocking of L-serine degradation by, 563
CO_2, conversion to methane, 413
Coformycin, AMP deaminase inhibition by, 255
Coimmobilization, of *N. europaea* and *P. denitrificans* cells, 659
Commercial composting plant, in heat analysis, 199
Composting, of dehydrated sewage sludge cake, 43
Composting, of sewage sludge, 199
Composting model, of sewage sludge, 441
Continuous culture, of *Acinetobacter calcoaceticus*, 229
Continuous culture, of human cells, 425
Continuous culture, with high density cell suspension, 319
Continuous monitoring, of volatiles, 723
Corn grits, for ethanol fermentation, 469
Corynebacterium acetoacidophilum, l-groline production by, 139
Corynebacterium sp., 2,5-diketo-D-gluconate reductase from, 311
Coumaran ring, cleavage of, 221
Cross-flow filtration, 179
Cross-flow filtration, separation of yeast by, 77
Cryoprotectant, 651
Cyanobacterium, *Lyngbya* sp., 597
Cyclomaltodextrin, formation from starch, 463
Cyclomaltodextrin glucanotransferase, producing bacteria of, 463
Cytochrome *c*, of *Methylomonas* sp., 621
Cytochrome *c*, production by a methylotroph, 261
Cytochrome *c*, production by mutant of *Methylomonas* sp., 629

D

Debaryomyces coudertii, phosphoenolpyruvic acid production by, 225
Dehydrodiisoeugenol, degradation by rumen bacteria, 221
Denitrification, by immobilized cells of *Paracoccus denitrificans*, 359
Dibutylphthalate, for extraction fermentation, 295
Dihydroxyacetone kinase, from *Gluconobacter suboxydans*, 107
2,5-Diketo-D-gluconate reductase, from *Corynebacterium* sp., 311

Dissolved oxygen concentration, as a control indicator for the cultivation of *Escherichia coli*, 7
Distillery waste, for methane fermentation, 49
Dormant organisms, at slow growth rates, 173
Dried *koji*, to manufacture *mirin*, 643
Drying efficiency, evaluation from composting model, 441
Drying, of composting material, 441
Drying, optimum operation for, 441
Dual hollow fiber membrane bioreactor, 575

E

Electron-microscope, of yeast cells treated with liquid nitrogen, 127
Elemental sulfur, as electron donor, 683
Endomycopsis fibuligera, Syn. *Saccharomycopsis fibuligera*, 387
Energetics, at slow growth rates, 173
Environmental factors, in the Yodo River, 193
Ergosterol, deficient mutant for biosynthesis of, 457
Escherichia coli, amino acid production by, 395
Escherichia coli, transformed with a hybrid plasmid, cultivation of, 7
Ethanol, continuous production by immobilized *Zymomonas mobilis*, 233
Ethanol, inhibitory effects on ethanol fermentation, 277
Ethanol, production from pineapple juice, 475
Ethanol analysis, by membrane gas sensor, 723
Ethanol fermentation, from corn grits, 469
Ethanol fermentation, kinetic analysis of, 277
Ethanol production, from starch, by using immobilized enzyme and cells, in a packed bed reactor, 531
Ethanol stripping, by pervaporation, 665
Ethanol-utilizing yeasts, properties of, 133
Evaporation, of water in shaking flask culture, 291
Evaporation, production from cheese whey, 249
Extraction, of valatile fatty acids, 301
Extraction of volatile fatty acids, by supported liquid membrane, 699
Extractive fermentation, for aceton-butanol production, 295
Extrusion treatment, for ethanol fermentation, 469

F

Fat production, by yeast, from sugar, 549
Fed-batch culture, of yeast, 325
Fermentative far synthesis, 549
Fermented food, yeasts from, 387
Ferredoxin, roles in hydrogen production, 153
Fixed film, of bacteria, 449
Flask culture, heat transfer of, 285
Flask culture, water evaporation of, 291
Formaldehyde, production by methanol yeast, 489
Freezing and thawing, of polyvinyl alcohol, 651
Fusant, of *Aspergillus niger*, 557

G

α-Galactosidase, from *Pycnoporus cinnabarinus*, 493
α-Gelactosidase, immobilization of, 493
β-Galactosidase, production under the control of the *trp* promoter, 7
Gamma-ray, effect on cellulase secretion, 703
Gardenia fruits, blue pigment formation by, 711
Gardenia fruits, blue pigment from, 419
Gibberella fujikuroi, production of gibberellins and bikaverin, 717
Gibberellins, production by *Gibberella fujikuroi*, 717
Glucoamylase, from *Rhizomucor pusillus*, 379
Glucoamylase, raw-starch-degesting, 379
Gluconobacter suboxydans, dihydroxyacetone kinase from, 107
Glucose isomerase, of *Streptomyces griseus*, 575
Glucose transfer, from the medium into cells, 603
β-Glucosidase, production of, 91
β-Glucosidase, the production by *Aspergillus wentii*, 95
Glutathione, purification of, 61
Glucose, concentration on-line control of, 325
Glucose, production of sorbitol from, 405
L-Glutamate, L-proline production from, 139
Glycine, mutant of *Methylomonas* sp. resistant to, 629
Glycine-resistant mutant, of *Pseudomonas* S395,

563
Glycosidase, from *Streptomyces* sp., 593
Growth rate, of nystatin-resistant *Hansenula polymorpha* mutant, 457
Growth yield, in the anaerobic chemostat culture, 159

H

H_2, conversion to methane, 413
Hansenula polymorpha, nystatin-resistant mutant of, 457
Haploid recombinants, 557
Heat transfer, of a shaking flask culture, 285
Heat treatment, of methanol yeast cells, 489
HETP, values of large-scale column, 111
High-concentration cultivation of lactic acid bacteria, 179
HPLC pattern, characteristic peak in, 675
Humic acid types, used in HV agar, 609
Humic acid-vitamin agar, for selective isolation of actinomycetes, 501
Hybrid plasmid, pUK11, 589
Hydrogel, 651
Hydrogen production, by immobilized cyanobacterium, 597
Hydrogen production, by *Lyngbya* sp., 597
Hydrogen production by *Rhodobacter sphaeroides* S, 153
Hyphomicrobium methylovorum, methanol dehydrogenase from, 371

I

Ice-nucleating activity, of *Pseudomonas fluorescens*, 693
Immobilization, of amyloglucosidase and *Zymomonas mobilis*, 531
Immobilization, of *Lyngbya* sp. on calcium alginate, 597
Immobilization, of microorganisms, 651
Immobilization, of whole cell enzyme, 575
Immobilization, on chitosan beads, 493
Immobilized cells, for blue pigment formation, 711
Immobilized cells, of *Gibberella fujikuroi*, 717
Immobilized β-glucosidase, 711
Indan compound, from cholesterol, production of, 525
Indoline, α-amino-β-(1-indoline)propionic acid, production by *Escherichia coli* from indoline and L-serine, 395
Interaction of pyruvate kinase, with Cibacron Blue, 517
Inulinase, immobilization of, 239
Isolation, of soil actinomycetes, 501
Isooctane, enzymatic hydrolysis of fats by lipase in, 23
Issatchenkia sp., ethanol-utilizing yeasts belong to, 133

K

2-Keto-L-gulonate, conversion from 2,5-diketo-D-gulonate, 311
Kinetics, of human cell culture, 425
Kinetic analysis, of ethanol fermentation by *Saccharomyces cerevisiae*, 277
Kinetic analyis, of the growth of *Spirulina* sp., 267
Kluyveromyces marxianus, ethanol production by, 249
Koji, with low water content, 643

L

Lactate, growth inhibition to human cells by, 341
Lactate, inhibition of human cell culture by, 425
Lactic acid bacteria, high-concentration cultivation of, 179
Lactobacillus casei, cultivation of, 179
Laminaran, effects on β-glucosidase production in *Trichoderma viride*, 91
Large-scale column, hight equivalent to a theoretical plate (HETP) values of, 111
Lignin, degradation of, 483
Lignin related compounds, 221
γ-Linolenic acid ester, selective separation of, 569
Lipase, hydrolysis of palm oil and beef tallow by, 23
Lipid, effect on *saké* brewing, 211
Lipid composition, of nystatin-resistant *Hansenula polymorpha* mutant, 457
Lipid composition, of *Zygosaccharomyces rouxii*, 365
Liquid distribution, large-scale column for liquid chromatography, 111
Lyngbya sp., hydrogen production by, 597

M

Maintenance energy, at slow growth rates, 173
Mammalian cell, oxygen uptake of, 341
Mass transfer coefficient, for gas, 665
Membrane gas sensor, for fermentation monitoring, 723
Membrane reactor, repeated use of lipase for fats hydrolysis in, 23
Metanogenesis, interms of carbon balances, 159
Methane, production from H_2 and CO_2 by *Methanobacterium thermoautotrophicum*, 413
Methane, production in membrane and ceramic bioreactors, 413
Methane fermentation, of distillery waste, 49
Methanobacterium thermoautotrophicum, methane production by, 413
Methanogenesis, effects of the antibiotics on, 31
Methanol, production of cytochrome *c* from, 261
Methanol dehydrogenase, from *Hyphomicrobium methylovorum*, 371
Methanol dehydrogenase, of *Methylomonas* sp., 621
Methanol dehydrogenase, production of sorbitol by, 405
Methanol yeast, formaldehyde production by, 489
D-Methionine, effect on amylase production, 707
L-Methionine-auxotrophic mutant, of *Pseudomonas* no. 18, 617
Methylotroph, methanol dehydrogenase of, 371
Methylomonas sp., cytochrome *c* and methanol dehydrogenase from, 621
Methylomonas sp., cytochrome *c* production by, 261
Methylomonas sp., cytochrome *c* production by mutant of, 629
Methylotroph, cytochrome *c* production by mutant of, 621, 629
Methylotroph, production of cytochrome *c* by, 261
Methylotroph, *Pseudomonas* strain, 563
Methylotrophic bacterium, 589
Microbial degradation, of particulate substrates, 431
Minicell, *in vivo* protein synthesis with, 589
Mirin mash, enzyme efficiency in, 537
Mirin-making, 537
Mirin-making, by using dried *koji*, 643
Mixed culture, of photosynthetic bacteria, 11
Model, of microbial degradation of particulate substrates, 431
Molecular sieve, immobilization on, 239
Monensin, effects of, on methanogenesis in DSFF reactor, 31

N

NADH, oxidation by peroxidase, 483
NADH-oxidizing peroxidase, extracellular enzyme, 483
Nitrate removal, for wastewater, 683
Nitrification-denitrification, using immobilized cells, 659
Nitrogen source, effect on ice-nucleating activity, 693
Nitrogenase, of *Rhodobacter sphaeroides* S, 153
Nitrosomonas europaea, immobilization of, 659
DL-Norvaline, effect on amylase production, 707
Nystatin-resistant mutant, of *Hansenula polymorpha*, 457

O

tri-*n*-Octylphosphine oxide, in a supported liquid membrane for fatty acids extraction, 301
On-line measurement, of glucose concentration, 325
Organic solvent, removal of, from antibiotics, 71
Oxidation, of refractory organics, 449
Oxygen diffusion, in the composting of dehydrated sewage sludge cake, 43
Oxygen uptake, of human cell, 341

P

Pachysolen tannophilus, aldose reductase from, 17
Paecilomyces variotii, for SCP production, 349
Palm oil, continuous culture of *Acinetobacter calcoaceticus* with, 229
Palm oil, hydrolysis of, by lipase, 23

Paracoccus denitrificans, immobilization of, 659
Paracoccus denitrificans, immobilization with polyelectrolyte complex for denitrification, 359
Particles, microbial degradation of, 431
Pectic wastewater, pretreatment by alkalophilic *Bacillus* sp., 243
Peroxidase, from *Phanerochaete chrysosporium*, 483
Peroxidase, oxidation of NADH by, 483
Pertraction of volatile fatty acids, 699
Pervaporation, for ethanol stripping, 665
Phanerochaete chrysosporium, peroxidase from, 483
Phenol, degradation of, 449
Phosphoenolpyruvic acid, production of, 225
Phospholipids, of *Zygosaccharomyces rouxii*, 365
Pineapple juice, ethanol production from, 475
Plasmid, pACYC177, pUK1, 589
Pleurotus sajor-caju, solid state fermentation of, 101
Polyelectrolyte complex, entrapment of *Paracoccus denitrificans* cells with, 359
Polyvinyl alcohol, for immobilization, 651
Porous PTFE membrane, 665
L-Proline, production by *Corynebacterium acetoacidophilum*, 139
Protease, *in mirin* mash, 537
Protoplast fusion, in yeast, 549
Protozoa, in activated sludge, 333
Pseudomonas, production of serine from glycine by, 563
Pseudomonas fluorescens, ice-nucleating activity of, 693
Pycnoporus cinnabarinus, α-galactosidase from, 493
Pyrite, bacterial oxidation of, 37
Pyruvate kinase, from *Candida guilliermondii*, 517
Pyruvate kinase, interaction with Cibacron Blue, 517

R

Raffinose, hydrolysis of, in beet sugar molasses, 493
Raw-starch-digesting glucoamylase from, 379
Rayon pulp waste, for SCP production, 349
Recombinant yeast strains, far production by, 549
Repression of serine hydroxymethyltransferase (SHMT), by L-methionine, 617
Respiration rate, effects of metabolites on, 341
Respiratory quotient, as a control indicator for the cultivation of *Escherichia coli*, 7
Rheology, of high density continuous cultures, 319
Rhizomucor pusillus, raw-starch-digesting glucoamylase from, 379
Rhodobacter sphaeroides, mixed culture with *Rhodocyclus gelatinosus*, 11
Rhodobacter sphaeroides S, hydrogen production by, 153
Rhodococcus mutant BNC production from sterols by, 525
Rhodococcus mutant, production of a new perhydroindanyl propionic acid by, 525
Rhodocyclus gelatinosus, mixed culture with *Rhodobacter sphaeroides* P47, 11
Rhodopseudomonas sphaeroides, 5-aminolevulinic acid production by, 511
Rhodopseudomonas sphaeroides, photosynthetic bacteria, 511
Rice, defatted by supercritical CO_2 treatment, 211
Rice, glutinous, regular, 543
Rice-*koji*, defatted by supercritical CO_2 treatment, 211
Rumen bacteria, 221

S

S^0-acclimated activated sludge, 683
Saccharomyces cerevisiae, ethanol fermentation by, 277
Saccharomyces cerevisiae, ethanol production by, 475
Saccharomyces cerevisiae, fed-batch culture of, 325
Saccharomyces cerevisiae, high density continuous culture of, 319
Saccharomyces cerevisiae, membrane injury in, 127
Saccharomyces cerevisiae, transformation of, 549
Saccharomycopsis fibuligera, α-amylase production by, 387
Saccharum munja, the production of mashrooms on, 101
Saké, brewing from defatted rice, 211
Salt-tolerant yeast, 365

Selective medium, for actinomycetes, 501, 609
Separation, of γ-linolenic acid ester using Y-zeolite, 569
L-Serine, α-amino-β-(1-indoline)propionic acid from, 395
Serine-producing methylotroph, 371
L-Serine production, by methylotrophic *Pseudomonas*, 617
L-Serine production, by methylotrophic *Pseudomonas*, from glycine, 563
Settling, of sewage activated sludge, by cationic surfactants, 583
Settling behavior, of activated sludge, 731
Sewage activated sludge, adsorption of cationic surfactants by, 583
Sewage activated sludge, settling of, 583
Sewage sludge cake, the composting of, 43
Shell-and-tube module, 665
Silicone tubing method, 723
Simulated moving-bed adsorber, equipped with a specially-designed rotary valve, 61
Single cell protein, from *Paecilomyces* sp., 349
Single cell protein, from rayon pulp waste, 349
β-Sitosterol and cholesterol, production of 20-carboxy-pregna-1,4-dien-3-one(BNC) from, 525
Sludge bulking, 731
Soaking process of rice, in *mirin*-making, 543
Solid state fermentation, of *Pleurotus sajor-caju*, 101
Somatic embryos, of alfalfa *in vitro* production, 353
Sorbitol, production by a methanol yeast, 405
Sorbitol, production by *Candida boidinii*, 405
Spore activation, by humic acid, 501
Steaming rice, in *mirin*-making, 543
Storage of dried *koji*, 643
Streptococcus cremoris, cultivation of, 179
Streptomyces, production of β-*N*-acetylglucosaminidase by, 593
Streptomyces griseus, glucose isomerase from, 575
Streptomyces sp., xylosidase of, 1
Spirulina sp., batch cultivation, of, 267
Supercritical carbon dioxide extraction, of organic solvent with supercritical CO_2, 71
Supercritical CO_2 extraction, application to *saké* brewing, 211
Supported liquid membrane, extractive fermentation by, 699
Supported liquid membrane, for extraction of volatile fatty acids, 301

T

Terramycin, effects of, on methanogenesis in DSFF reactor, 31
Thermal balance, in composting, 199
Thermophilic composting, of sewage sludge, 675
Thermophilic fungus, *Rhizomucor pusillus*, 379
Thermotolerant yeast, *Hansenula polymorpha*, 457
Thiobacillus denitrificans, autotrophic denitrification with, 683
Thiobacillus ferrooxidans, oxidation of pyrite by, 37
Transformation, in yeast, 549
Trichoderma reesei, cellulase secretion by, 703
Trichoderma viride, β-glucosidase production by, 91
Two-step desorption operation, a fixed-bed column system of, 569

V

Volatile fatty acids, extraction from aqueous phase, 301
Volatile fatty acids, extraction from fermentation broth, 699
Volatile fatty acids, in methane fermentation, 49

W

Water, evaluation of quality for taste and health, 185
Water, index of taste and health of, 185
Water, quality and biological parameter in the Yodo River, 193
Water soluble organic materials, transformations of, 675
Water vaporization, in composting plant, 199
Wood chips, as a bulking agent, 675

X

Xanthan gum production, effect of glucose concentration on, in a fed-batch culture, 603
Xanthine-requiring mutants, derived from

a *Bacillus* sp., 145
Xanthomonas campestris, xanthan gum production by, 603
Xylooligosaccharide, induction of xylosidase in *Streptomyces* sp., 1
Xylosidase, of *Streptomyces* sp., 1

Y

Yeast, separation of, 77
Yeasts, as a indicator of water pollution, 193
Yeast cells, membrane injury in, by liquid nitrogen treatment, 127
The Yodo River, quality and biological parameter of water in, 193
Yogurt, mortality of bifidobacteria in, 215

Z

Y-Zeolite, for purification of γ-linolenic acid ester, 569
Y-Zeolite, regeneration of, 569
Zoogloca ramigera, in activated sludge, 333
Zygosaccharomyces rouxii, change of lipid composition of, 365
Zymomonas mobilis, ethanol production by, 233
Zymomonas mobilis, immobilization of, 531
